

Blown Film Dies for Special Films

ETA is experienced in the development and supply of blown film dies for film specialities.

Examples

- multi-layer biaxially oriented films
- medical films
- foil made from thermoplastic elastomers (TPU, TPE) or special material formulations e. g. soft-PVC
- small tubes

Special Criteria

- spiral mandrel manifolds or flat disks (circular distributors)
- concentric or sequential
- materials adapted to product requirements
- modular design
- special cooling systems

We offer customised solutions tailored to customer and product specifications.

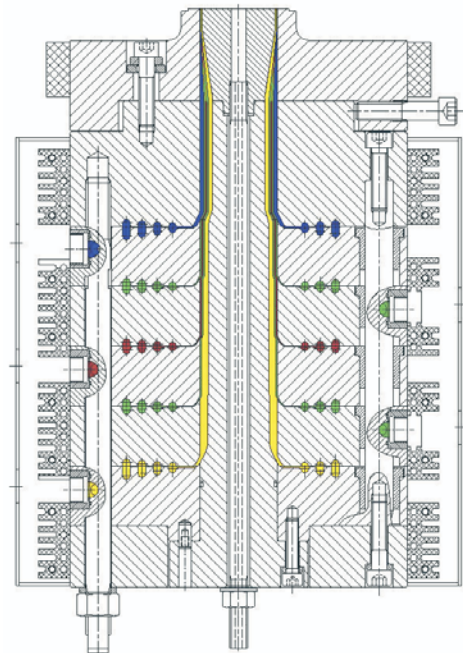

Modular 3-layer die

7-layer die with CV technology

Mini laboratory die

Modular lab die
for film development
